

A SIMPLE ROUTE FROM EVALUATION TO PRODUCTION

Start light. **Scale when it's proven.**

Explore first. Choose how to build. Operate when the workflow is proven. There is no mandatory funnel — choose the least burdensome route that matches the outcome you need now.

01 EXPLORE

Understand the capability

02 BUILD

Choose one of two routes

03 OPERATE

Run trusted workflows

ENTITY Sandbox

Learn before committing

BEST FOR

Developers evaluating how ENTITY behaves.

OUTCOME

An informed technical fit decision.

INCLUDES

Documentation, examples and API structures on realistic sample data.

PRICING

Free exploration. No production use, private delivery or live monitoring.

NEXT

Choose either Build route when there is a real workflow to prove.

Developer Access

Build independently

BEST FOR

A developer or technical team able to integrate largely independently.

OUTCOME

Build and validate one genuine company-identity workflow.

INCLUDES

Bounded access to released capabilities for agreed territories and evidence levels, with onboarding, documentation and shared support.

PRICING

Monthly organisation subscription with controlled live usage. No consulting or production SLA.

NEXT

Continue building, move directly to Production, or choose the Programme if structured delivery is needed.

Founding Customer Programme

Build with Sustema

BEST FOR

A sponsored problem requiring Sustema delivery, evidence or governance.

OUTCOME

Define, integrate and prove one workflow, then make a formal Production decision.

INCLUDES

A 12-week engagement with a shared success scorecard, working sessions, milestones and direct product involvement.

PRICING

Fixed, scoped engagement. Additional workflows, paid data and post-programme production are separate.

NEXT

Transition the proven workflow into Production, or close with an evidence-based decision.

ENTITY Production

Operate with confidence

BEST FOR

An organisation ready to rely on ENTITY in one or more live workflows.

OUTCOME

Trusted company identity operated reliably and expanded over time.

INCLUDES

Contracted capabilities, territories, usage, environments, support and commercial rights.

SERVICE

Defined coverage, freshness, monitoring and commitments appropriate to scope.

PRICING

Annual contract linked to capacity; premium data and broader rights are scoped explicitly.

TRUST BUILT IN Across ENTITY, results expose confidence, provenance, limitations and attribute-level evidence. Registry-backed coverage begins with UK and French official sources, supported by GLEIF evidence for LEI-bearing entities across 200+ jurisdictions. Need a specific market? Tell us — customer demand helps determine what we add next.
